FREQUENCY DISTRIBUTIONS OF PARTICIPATING FARMS

in

1973 Feed Grain, Wheat, and Cotton Set-Aside Programs

By Size of Allotment or Base

Tom Stucker

United States Department of Agriculture
Agricultural Stabilization and Conservation Service

1973 Feed Grain, Wheat, and Cotton Set-aside Programs

Explanatory Note

THIS PUBLICATION IS DESIGNED TO PRESENT SOME IDEA IN TOTAL AND BY COMMODITY, OF FARM PARTICIPATION IN THE 1973 FEED GRAIN, WHEAT AND COTTON PROGRAM BY SIZE OF ALLOTMENT OR BASE.

Small differences in this publication and corresponding data in the annual program report for Feed Grain, Wheat, and Cotton Programs are due to the rounding of figures.

1. The Frequency Distributions in 11 and 12 ranges are by State and National totals for each of the programs. Feed Grain program data are shown separately for total Feed Grain, Feed Grain participation at 0% set-aside and at 10% set-aside, Corn, Grain Sorghum and Barley. Wheat Program data are presented in total, and with participation at 0% set-aside and at both minimum and additional set-aside. Within each frequency range are shown the participating farms with related cropland, conserving bases, allotments or bases, set-aside acres, set-aside payments, payment rates per acre, and planted acres on Feed Grain and Wheat with percent plantings are of bases. Set-aside acreage includes acres reduced because of \$55,000 payment limitation and summer fallow provision.

In some instances the number of farms shown will have no corresponding figures in the base or planted acreage columns because the acreage is less than 500 acres. Cotton Planted Acreage Data on individual farms are not available.
